SUMMARY

Computer Science undergraduate with hands-on experience in software development, data analytics, and machine learning. Interested in building scalable applications and data-driven systems, with experience in end-to-end development and modern technologies.

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology – Computer Science and Engineering

August 2023 – Present

Coimbatore, Tamil Nadu

CGPA: 7.95 (up to 6th Semester)

St. Joseph Public School, Pattanakad

*XII - ISC - **Percentage** - 92%*

June 2011 – March 2023

Alappuzha, Kerala

*X - ICSE - **Percentage** - 91%*

EXPERIENCE

FideltaV

Frontend Developer Intern

April 2026 – Present

Remote / Kerala, India

- Developing responsive, scalable UI components for **Esculo**, an AI-powered healthcare platform serving clinic, pharmacy, and laboratory workflows, using React and modern frontend tooling. Focused on building modular, reusable components that reduce development overhead across multi-system integrations.

SabPaisa

Data Analyst Intern

October 2025 – December 2025

Bengaluru, Karnataka

- Worked as part of the Data Analytics & Machine Learning team on SabPaisa's Payment Orchestration Platform, performing EDA on transaction data, developing feature engineering pipelines, building predictive models for payment success, and Built Power BI dashboards processing 50K+ daily transactions, reducing reporting time by 30%.

Youth United Council Of India

Event Management

January 2025 – Present

Chennai, Tamil Nadu

- Coordinated logistics and supported planning for 3+ national events (200+ participants) as a member of the Youth United Council of India.

PROJECTS

LifeForgeConnect- | Full-Stack AI Healthcare Platform

- Designed and developed an AI-powered donor-patient matching system integrating blood, organ, bone marrow, and milk bank registries into a unified platform.
- Implemented predictive shortage forecasting (72-hour ML model), real-time multi-parameter compatibility scoring, and geospatial transport optimization using React, FastAPI, TensorFlow, PostgreSQL, Redis, and Hyperledger Fabric.

ShedForge | Constraint-Based Timetable Optimization Platform(Agile Development)

- Designed and implemented a full-stack academic scheduling system using a Genetic Algorithm with Local Search to generate conflict-free timetables under faculty, room, and workload constraints.
- Built REST APIs and analytics dashboards to evaluate constraint satisfaction metrics and generate alternative schedules for comparison.

The Influence Crew | Business Analytics & Predictive Insights Platform

- Developed and deployed predictive analytics and ML solutions using Python, SQL, Logistic Regression, Random Forest, and PCA on 4,210+ survey records to generate business insights and automate data-driven analysis.
- Built interactive Tableau, Power BI, and Streamlit dashboards with KPI visualization, correlation analysis, clustering, and ROI forecasting to support analytical decision-making and reporting.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, JavaScript, C#

ML & AI: TensorFlow, spaCy, NLP, Predictive Modeling, Feature Engineering

Data & Analytics: Exploratory Data Analysis, Power BI, Tableau, MS Excel

Backend & APIs: REST APIs, FastAPI, Microservices

Databases: MySQL, PostgreSQL, SQLite

Tools: Git, Jupyter Notebook, VS Code, Streamlit

ACHIEVEMENTS

Guidewire DEVTrails University Hackathon — in partnership with EY

*Diamond Tier — 37th out of 4000+ teams — CTF Challenge — **Ranked 2nd***

- Progressed to the **Soar Stage (Phase 3)** out of all competing teams, placing in the **Diamond Tier** and ranking **37th globally out of 4000+ teams**. In the Phase 2 Scale Stage CTF Challenge, secured **2nd position** out of all participants — demonstrating strong problem-solving ability under competitive conditions.

Hyrup Hackathon

Finalist — Top 50 out of 10,000+ participants

- Selected among the top 50 finalists out of 10,000+ participants nationwide. Recognised by the jury panel and awarded an internship offer based on project performance and technical evaluation during the hackathon.

Odoo Hackathon

Finalist

- Qualified for the final round of the Odoo Hackathon, presenting an innovative solution and competing among the top teams.
